Content for the TRCC website (May TRCC Meeting) has been updated.

TRCC Website - <http://www.ct.gov/dot/cwp/view.asp?a=2094&q=435916>

Thanks to the Office of EMS for hosting the May meeting of the TRCC!

The meeting began with opening remarks from Dr. Jewel Mullen, Commissioner of the Department of Public Health (DPH). Ray Barishansky, Director of the Office of EMS, welcomed stakeholders to the first ever TRCC meeting at DPH, and Jean Speck and Ann Kloter of OEMS gave a brief update of data initiatives, including the State's link to the National EMS (NEMSIS).

The traffic records update included a thank you for all stakeholders participating in and contributing to this year's Traffic Records Strategic Plan, and a Save-the-Date for a Peer Exchange, to be conducted at Central Connecticut State University (CCSU), on October 7-8, for the Strategic Highway Safety Plan (SHSP).

Results from a Law Enforcement Technology Questionnaire were presented, assessing technology shortcomings for Local police departments; including responses from 54 towns, and contact information for each of the departments responding.

An update of the Crash Data Improvement (CDIP) initiative was presented, including 79 active agencies, who have submitted approximately 24,000 electronic cases to production folders, and 33 active agencies in test that have submitted about 2200 cases. The CDIP goal is to move all remaining agencies to their production folders before the end of June.

Consensus approval of the 2015-2016 Traffic Records Strategic Plan, involved multiple drafts of the Plan posted to the TRCC website during the first quarter of 2015, the addition of further review/editing by stakeholders in March and April; feedback/modifications; and a final canvassing of stakeholders during the May meeting, approving the Plan.

June 16 TRCC Meeting Cancelled

Due to the progress of the TRCC, conflicting schedules at such a busy time of the year and a huge two-day Data Event (June 16-17) at the U.S. DOT in Washington, DC, the June meeting of the TRCC will be rescheduled for a date later this Summer.

**2015 Transportation Datapalooza
to be held June 16-17 at the U.S. DOT in Washington, DC.**

Registration is Free

Sample highlights include: a) The latest information on various USDOT data initiatives, b) USDOT's 30 Year Framework for the Future, c) Safety data: what data is currently collected, how is safety data used, what is needed to improve the utility of our safety data, and examples of innovative solutions for improving safety data, d) Overview of NHTSA's crash databases, e) Safety data resources and technical assistance provided to States by the FHWA, f) Performance management: making choices based on information, showing what that decision means, and how transportation dollars are spent, g) Highway performance monitoring system, and h) An interactive platform for engaging audiences.
